## OSGOOD-BRADLEY «ELECTROMOBILE»

Scranton Railway  
shapeways\* <http://shpws.me/DBC1>

In 1929, Scranton Railway Company began a modernization program with the purchase of ten "Electromobiles" built by the Osgood Bradley Car Company of Worcester, Massachusetts. These were the most modern streetcars available at that time.

Altoona & Logan Valley Electric Ry. purchased identical cars, the main difference was an unique marker light on the front ends.

Similar cars with slightly longer platforms were delivered new to New Bedford and sold later to the Queensborough Bridge Streetcar Line in New York.
